

MyDogDNA PASS

Nickname: Toro
 Breed: Curly Coated Retriever
 Registered name: AD Victoriam Tornado Beta
 Registration ID:
 Tattoo / Microchip: 982000167795500
 Gender: Male
 Owner: Irena Hermanovic
 Country: 

ISAG DNA Profile

Dog's identity verified from microchip or tattoo by veterinarian or other authorized person during sample taking: **Yes**

DNA ID: **8700 2321 9279 667**

[Identified with standard ISAG markers](#)

[Genetic Health Index calculated by the MyDogDNA database: 94](#)

Traits

Trait	Genotype 	Description
Colour Locus A	at/at	The dog is homozygous for at-allele. Learn more about this trait
Colour Locus B	bs/bs	Your dog is homozygous for bs allele. Learn more about this trait
Colour Locus E	E/E	The dog is homozygous for E allele. Learn more about this trait
Colour Locus H	h/h	The dog is homozygous for h allele. Learn more about this trait
Colour Locus K	KB/KB KB/kbr kbr/kbr	The dog is homozygous for three nucleotide deletion. Learn more about this trait
Furnishings / Improper Coat in Portuguese Water Dogs (marker test)	GG/CC	The dog is not genetically likely to express furnishings. Learn more about this trait
Coat length / "Fluffy" in Welsh Corgi	T/T	The dog carries two copies of the genetic variant typically associated with a long-haired coat. Dogs with this genotype typically have long coat. Learn more about this trait
Curly coat	C/C	The dog is genetically non-curly. Learn more about this trait
Natural Bobtail (T-box mutation)	C/C	The dog does not carry any copy of the bobtail mutation. It therefore likely has a long-tailed phenotype. Learn more about this trait
